

Employee Management System (HRMS)

Detailed Feature Documentation Based on Current Codebase

Executive Summary

The application is a multi-role HRMS platform supporting Admin, Employee, Team Leader, Manager, HR and Finance workflows. Core modules include authentication, user management, leave management, reimbursements, notifications, holiday management, profile management and reporting.

Role Matrix

Admin manages the system. Employees submit requests. Team Leaders, Managers and HR approve workflows. Finance handles reimbursement payments and financial visibility.

Admin Features

- User Creation, Editing and Deletion
- Role Assignment
- Team Management
- Reporting Structure Assignment
- Holiday Management
- Leave Reports
- Reimbursement Reports
- Dashboard Analytics
- Search, Filters and Export Capabilities

Employee Features

- Dashboard
- Leave Requests and History
- Reimbursement Submission
- Receipt Uploads
- Signature Upload
- Profile Management
- Password Change
- Notifications
- Holiday Calendar

Team Leader Features

- Leave Approvals
- Reimbursement Approvals
- Team Visibility
- Approval Notifications

Manager Features

- Review Team Requests
- Approve or Reject Leave
- Approve or Reject Reimbursements
- Leave Calendar Visibility

HR Features

- Final Reimbursement Approval
- Employee Request Monitoring
- Organization Leave Oversight

Finance Features

- Approved Leave Records
- Reimbursement Processing
- Mark Reimbursements as Paid
- Payment Tracking and Finance Dashboard

Leave Management Workflow

Employee → Team Leader → Manager/HR → Final Approval or Rejection

Capabilities:

- Leave Type Selection
- Date Range Management
- Supporting Documents
- Status Tracking
- Approval History

Reimbursement Workflow

Employee → Team Leader → Manager/HR → Finance → Paid

Capabilities:

- Multiple Expense Items
- Multiple Receipt Uploads
- Business Purpose Tracking
- Approval Tracking
- Payment Processing

Notifications

- Notification Center
- Read/Unread Tracking
- Approval Notifications
- Request Status Updates

Reports & Analytics

- Leave Reports
- Reimbursement Reports
- User Reports
- Search
- Filters
- Pagination
- Data Export

Security

- JWT Authentication
- Protected Routes
- Role-Based Access Control
- Password Hashing

Current Gaps Identified

- Attendance backend not fully implemented
- Payroll module absent
- Payslip generation absent
- Audit logging absent
- Real-time notifications absent

Future Roadmap

1. Payroll & Payslips
2. Monthly Attendance Summaries
3. Audit Logs
4. Real-Time Notifications
5. Employee Self-Service Enhancements
6. Mobile Optimization
